EXPERIENCE

Aire Logic, Leeds (UK) — Front End Developer

JAN 2021 - PRESENT

- Worked on dashboard user interfaces comprising various widget components to help clinicians access patient data.
- Introduced a modern UI caching solution for server data across the application to improve both User and Developer experience.
- Implemented Integration Testing using Jest and React Testing Library to the application to reach healthy code coverage.
- Contributed to and maintained a component library of reusable components for the company's main application, utilizing tools such as Lerna for monorepo management and Storybook for component documentation and visualization.

William Hill, Leeds (UK) — UI Developer

FEB 2019 - DEC 2010

- Design, architecture and development of internal user interfaces utilizing modern Javascript, React, Redux, HTML5 and SCSS.
- Migrating legacy AngularJS applications over to modern React.
- Integration of Unit Testing using Jest and Enzyme/React Testing Library to ensure proper test coverage across applications.
- Following clean code principles to ensure quality code across applications
- Following continuous integration practices across all projects through CI/CD Pipelines.
- Connecting to asynchronous RESTful services utilizing Promises
- Maintaining and improving existing User Interfaces.

iPOP Digital, St. Helier (Jersey) — Web Developer

2017 - 2018

- Converting PSD files into bespoke, fully functional, user friendly, responsive websites optimized for a variety of devices.
