EXPERIENCE

William Hill, Leeds (UK) — UI Developer

FEB 2019 - PRESENT

➔ Design, architecture and development of internal user interfaces utilising modern Javascript, React, Redux, HTML5 and SCSS.
➔ Migrating legacy AngularJS applications over to modern React.
➔ Integration of Unit Testing using Jest and Enzyme/React Testing Library to ensure proper test coverage across applications.
➔ Following clean code principles to ensure quality code across applications
➔ Connecting to asynchronous RESTful services utilising Promises
➔ Maintaining and improving existing User Interfaces.

iPOP Digital, St. Helier (Jersey) — Web Developer

2017 - 2018

➔ Converting PSD files into bespoke, fully functional, user friendly, responsive websites optimised for a variety of devices.
➔ Integrating websites with Craft CMS for clients to easily edit and manage content.
➔ Maintenance of existing websites.
➔ Developing additional features for existing websites.
➔ Dealing with general client queries.
➔ Tools/Languages used: HTML, Jade (HTML templating language), CSS, SCSS, Javascript, jQuery, GSAP, Twig (PHP templating language), Craft CMS, Photoshop, Bitbucket (GIT version control system).

States of Jersey, St. Helier (Jersey) — Project Officer

2016 - 2017

➔ Managing various Health & Safety, Eco-Active and general business projects.
➔ Reviewing and compiling up-to-date documents and procedures.
➔ Assisting with general administrative duties.

PROJECTS

[MusicianHub](#) — [View Code](#)

HTML, CSS, Javascript, React, Redux, Node, Express, MongoDB

A social network application to help local musicians connect with each other. This is a full stack application built with the MERN stack

[Indecision](#) — [View Code](#)

HTML, CSS, Javascript, React

A simple app built to learn the foundations of React. The app lets you enter some options and have the computer randomly choose one for you

[GitHub Finder](#) — [View Code](#)

HTML, CSS, Bootstrap, Javascript, GitHub API

An app built to practice using modern JavaScript features such as Classes, Promises and async/await function. This app lets you search for a GitHub user based on their username.
